

Our Goal

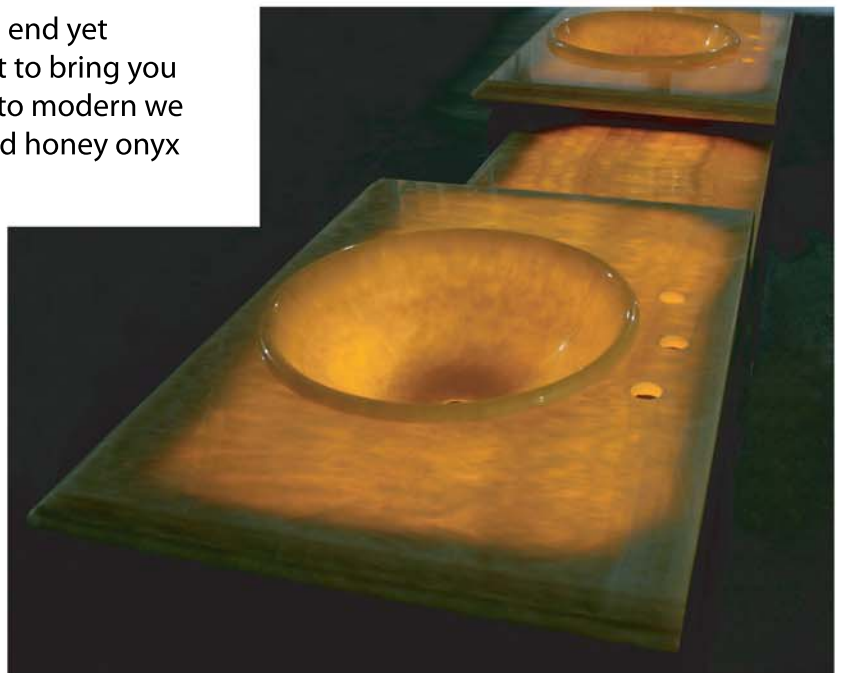

“ It is not only a vanity”

Natural stone which is an elegant yet powerful material which is born deep beneath the earth and extracted from the side of mountains. During its formation it takes on unique features and characteristics, colors and patterns emerge in its surface which gives each piece a one of a kind personality. In our natural stone products, this

individuality is refined, honed, carved and enhanced. The result is a line of Bathroom vanities which are elegant and sophisticated, while still retaining the inherent power of real stone.

All of the products are of original Designs. Created by our team of highly skilled artistic stone fabricators, these represent the cutting edge in natural design. Other products include several lines of imported porcelain, glass and stone vessel sinks. We are the direct importer and source for many of these products and most can not be found anywhere else in the United States.

We are a company that specializes in high end yet affordable bathroom products. In our effort to bring you the most innovative ideas from traditional to modern we have created this collection of Mood lighted honey onyx countertop bathroom vanities.

LED Vanity

 **Silkroad exclusive**

High end modern yet traditional piece of furniture that will bring a elegant relaxing feeling to your bathroom space. Currently our vanity model is a one of a kind and would definitely be a conversation piece.

LED (Light Emitting Diode) is used to create a mood lighted honey onyx stone. As the light from the LED passes through the translucent stone vanity counter top, it illuminates the honey onyx creating a stunning visual effect. As it moves out into the surrounding room it retains many of the colors found within the stone. Transmitting them to the ambience of the space, creating a gentle, calming and romantic mood lighting effect. LED is a low voltage energy efficient way of lighting this piece. The attributes to LED lighting are low energy consumption with no UV radiation, using little heat and lights instantly and are highly rugged. They feature no filament that can be damaged due to shock and vibrations which gives you over 20,000 hours and longer prior to replacing.

Our use of LED lights and our design along with a natural honey onyx stone counter top and vessel will give your bathroom a high end elegant look for years to come.
